React Introduction

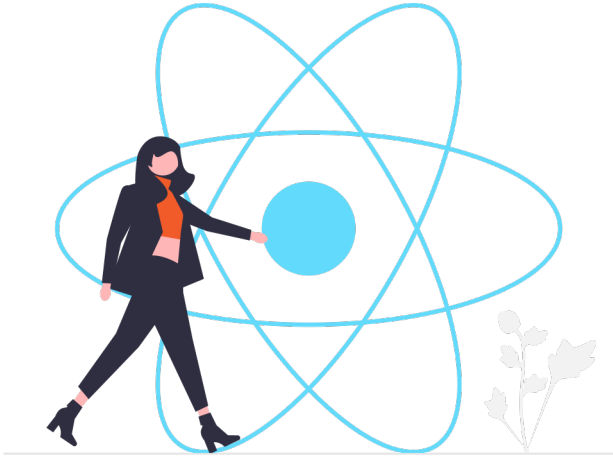
What is React.js?

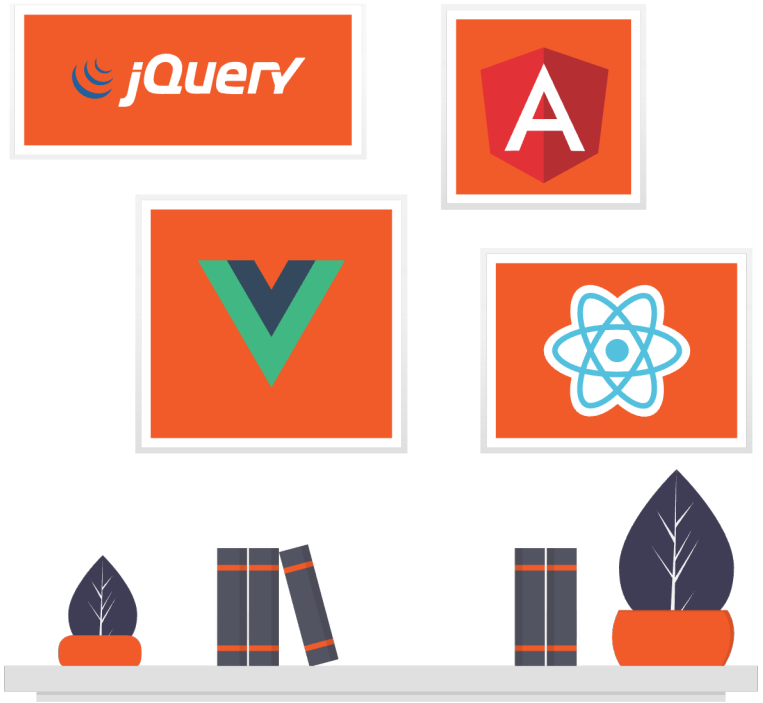
What is React.js?

- React is a JavaScript **library** for building interactive user interfaces
- Developed by Facebook, released as open-source software in 2013
- Has quickly become one of the most popular tools for building robust, interactive web applications

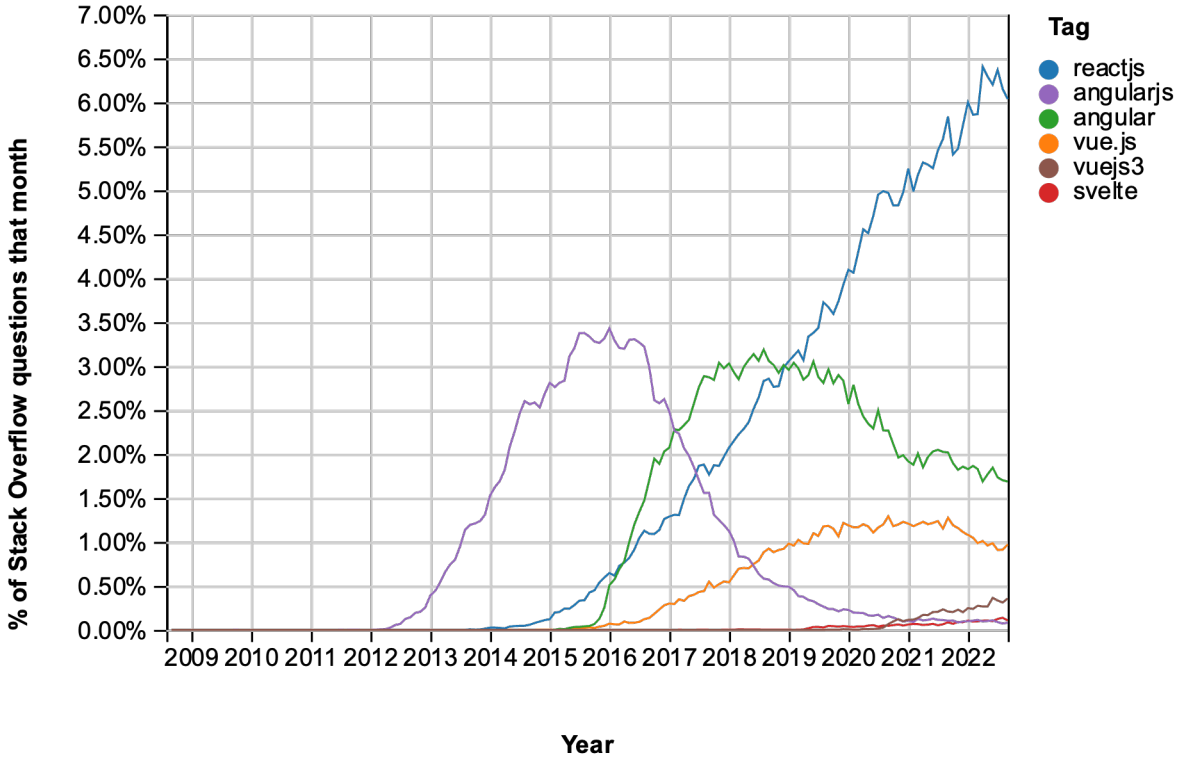


What about Angular and Vue?

- Angular and Vue are **Frameworks**
- Frameworks include more out-of-the-box tools for developing complete web applications (routing, testing)
- Comparatively, React is *less opinionated* about how you construct your apps



% of Stack Overflow Questions



Who is using React?

- Facebook
- Instagram
- Whatsapp
- Airbnb
- Discord
- Dropbox
- Atlassian
- Netflix
- Reddit
- Venmo

Why use React?

- Flexible (unopinionated library)
- Fast DOM updates
- Build reusable components
- Strong community support
- Easy to learn

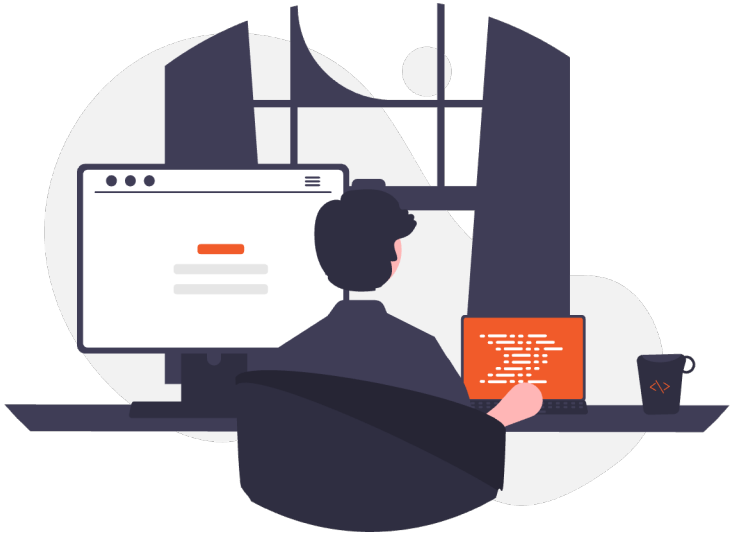
React Introduction

Getting Started with React

Getting Started with React

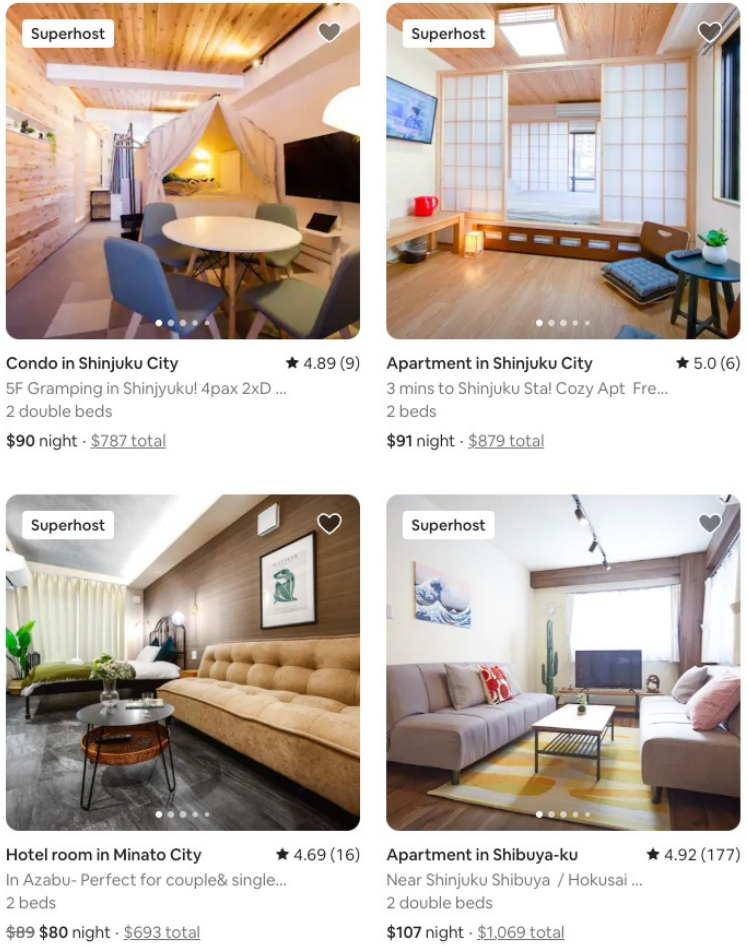
- Typically, developers will initialize new projects using a generator such Create React App

- A minimum version of React can be added to an HTML page via CDN



What's a Component?

- Encapsulated piece of code
- Responsible for rendering a specific portion of the page
- Can contain other 'child' components rendered inside



JSX (JavaScript Syntax Extension)

- An HTML-like syntax for creating components
- Allows the use of embedded JS expressions
- Not included in base React library
- Not required, but recommended!

Let’s try it!
